Jurong West st 41, Blk 477, 640477

PERSONAL STATEMENT

I am seeking for software development related role where I can apply my technical skills. During my time in Singapore Polytechnic, I have developed proficiency in Java, Java Script, SQL, Figma, PostgreSQL and Python with IOT skills. During my internship at 1CLOUDSTAR, I have further developed my skills in python, Flask, SQLAlchemy and Django. I also gained foundational knowledge of Google Cloud Platform (GCP) and Amazon Web Services (AWS), expanding my understanding of cloud-based application development and deployment.

SKILLS

- Programming Languages: Java, JavaScript, Python, SQL (MySQL, PostgreSQL, SQL Server)
- Frontend Development: React, jQuery, Bootstrap, Tailwind CSS, HTML5, CSS3, Responsive Web Design
- Backend Development: Node.js, RESTful APIs, JSON, ORM Technologies (Django, Flask, SQLAlchemy)
- Testing: Playwright, Vitest, Pytest, Django Test Framework, API Testing with Postman
- Software Engineering: Object-Oriented Programming (OOP), Agile Methodologies, CI/CD
- Cloud & Cybersecurity: Google Cloud Platform (Basic), AWS (Basic), Basic understanding of data encryption, vulnerability assessment, and web application security best practices
- Tools & Platforms: Docker, Git, GitHub, Postman, Linux, Windows, VS Code, Jira, Bitbucket, Figma
- Data & Enterprise Technologies: Power BI, Data Visualization
- UI/UX Design: Experience conducting user interviews, creating journey maps and site maps, usability testing planning, and designing with Figma
- Analytical Thinking, Problem-Solving, Communication (Written & Spoken), Collaboration, Digital Fluency, Decision Making, Adaptability, Customer Orientation

PROFESSIONAL EXPERIENCE

1CLOUDSTAR PTE. LTD

Application Developer (Internship)

APR 2025 - FEB2026

Contributed to the development of a cybersecurity web application focused on automated network device monitoring and vulnerability management. Assisted in frontend and backend development using React, Tailwind CSS, Python, and SQLAlchemy, including wireframe design, feature implementation, and debugging. Worked with technologies such as Docker, Nginx, AWS EC2, Zabbix API, and NIST CVE API for deployment and vulnerability analysis. Collaborated with team members using Git and Agile Scrum practices throughout the project lifecycle.

Andaz Hotel

Banquet Server (Part Time)

APR 2024 - Feb 2026

Served 200+ guests per 8–10 hour banquet shift in a fast-paced event environment, supporting smooth service operations through effective teamwork and coordination.

PROJECTS

AI powered vulnerability Scanning Tool (Internship Project)

Description : Developed an AI-powered vulnerability scanning tool to monitor devices, identify potential security vulnerabilities, and provide recommendations for remediation.

Technologies Used : Python, Django, SQLAlchemy, React, Tailwind CSS, Gemini (AI), Scrum, Git, Docker, Zabbix APIs, NIST CVE APIs, Jira, Bitbucket, AWS EC2

Automating Data Insights with Cloud Data Warehouse (Internship Project)

Automate extraction data from Facebook APIs, transformation and storage of video insights into Google BigQurey with the help of scheduler on Google Cloud Composer. Develop a robust, scalable Composer DAG workflow for regular data updates.

Technologies Used: Python, Google Cloud Composer, Airflow DAGs, BigQurey

Pet Gardians (Full Stack Development)

Developed a digital pet care platform by designing database tables and implementing API endpoints to support features such as pet training, feeding, grooming, and quest-based activities.

Technologies Used : Java Script, MySQL, HTML, CSS, Data Normalization and Git, JWT

Analysis and Handling of Transaction Data for a Bank

Analyze the data within the database and create a website for the bank transaction.

Technologies Used : JavaScript, Databases, Servers, Front-end Development.

Student Management System With Java GUI

Developed a student management system using Java Swing that allows students to manage academic modules and view their GPA, while administrators can add students, monitor GPA records, and manage attendance.

Technologies Used: Java, Java Swing.

Focus Flow (Application Design)

Led the team in design and development of a user interface focused on improving usability and user experience, including conducting user research, creating user journeys, and developing wireframes and a sitemap.

Technologies Used : User Interface Design, Figma, Wireframes, Prototyping

Senior Safety Monitoring System

Implemented AI-based activity detection to identify falls or unusual behavior through real-time camera monitoring. Integrated Telegram API to send instant alerts to family members and emergency contacts upon abnormal detection or manual trigger via push button.

Technologies Use: Python and IoT sensors (camera, motion sensor, push button, buzzer), Telegram API, YOLO (AI object detection)

EDUCATION

Singapore Polytechnic

APR 2023 - Feb 2026

Diploma in Information Technology
(Software development Specialization)
3.51/4 overall GPA

CERTIFICATES

- Certification in AI Ethics & Governance (Associate), Singapore Computer Society (Feb 2026)
- Google AI Professional Certificate, Google & Coursera (May 2026)
- ADVANCED YOUTH CYBER EXPLORATION PROGRAMME (Dec 2024)
- Mission X By Youth Corps Singapore(Oct 2024)

VOLUNTEER EXPERIENCES

- SOC Alumni Homecoming
- Mission X Camp - Youth Corps
- Participant – Advanced Youth Cyber Exploration Programme (A.YCEP)
- Singapore Polytechnic Open House
- Judge at 5 Asia-Pacific STEM/AI Technology Innovation Challenge

LANGUAGES

- English: Professional Working Proficiency
- Burmese: Native Proficiency
